Project Design Phase-II
Data Flow Diagram & User Stories

Date	20 October 2026
Team ID	Deepika Landge
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytics
Maximum Marks	4 Marks

Data Flow Diagrams:

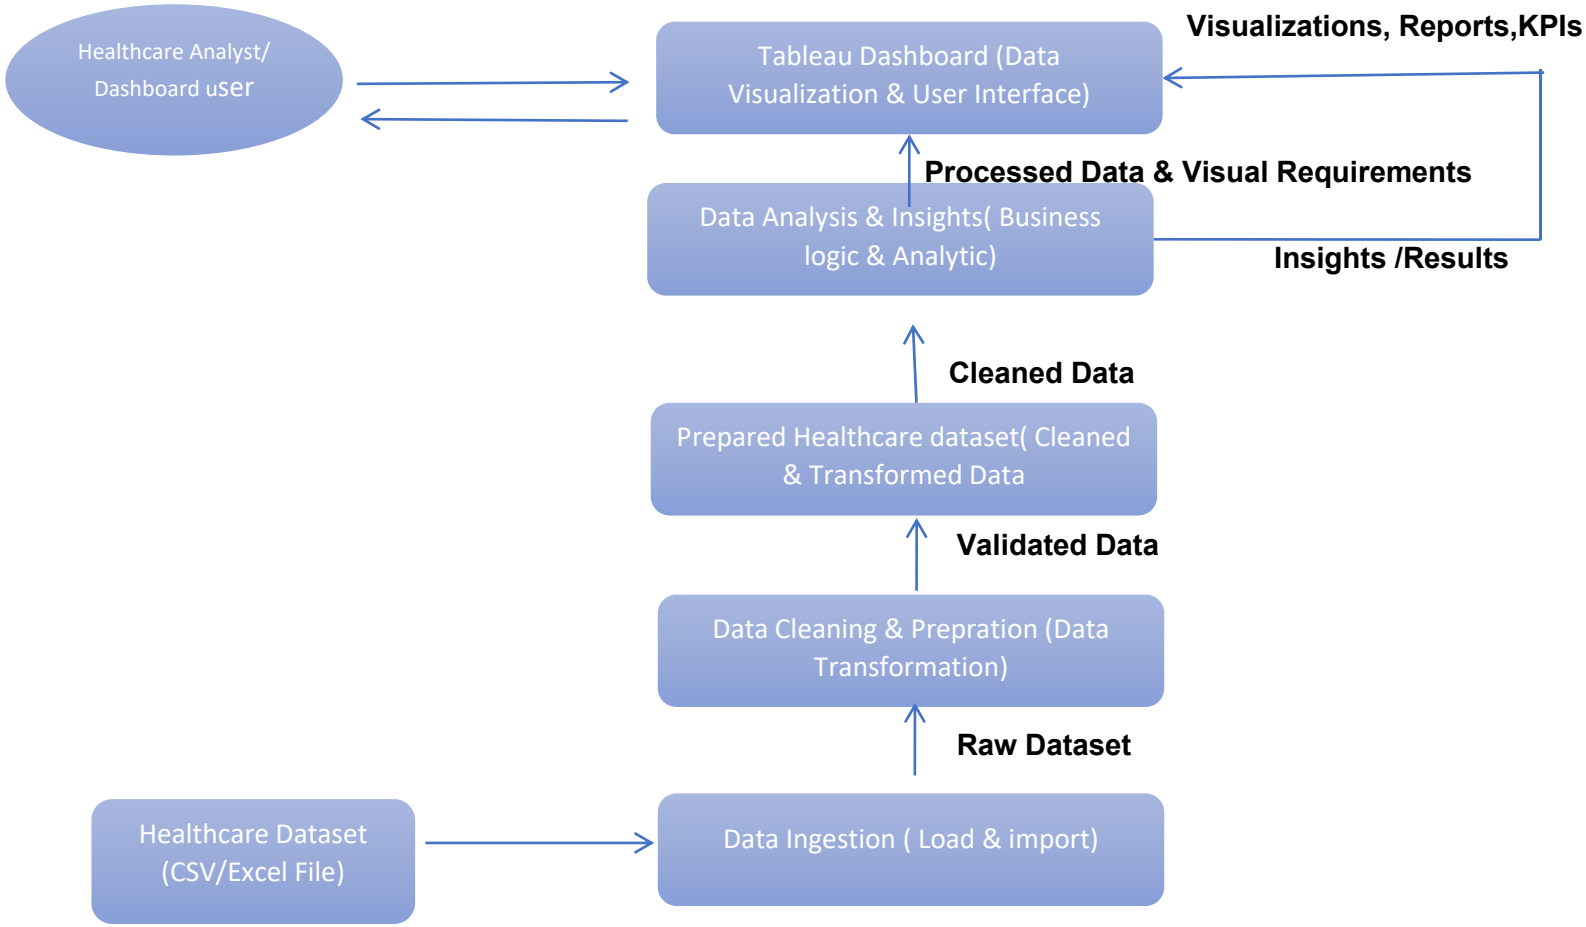

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory).

Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Data Analyst	Data Access & Integration	USN-1	As a data analyst, I want to import the healthcare dataset from a CSV file into tableau so that I can analyze the available patient data.	Dataset loads successfully and the required columns are available.	High	Sprint-1
Data Analyst	Data Processing	USN-2	As a data analyst, I want to check missing values, duplicate records and incorrect data types so that the dataset is ready for analysis.	Data quality issues are identified and documented or corrected where appropriate.	High	Sprint-1
Healthcare Analyst	Bussiness Analysis	USN-3	As a Healthcare analyst, I want to calculate relevant healthcate KPIs so that I can summarize the available health data.	KPI calculations are accurate and consistent with the dataset	High	Sprint-1
Healthcare analyst	Bussiness Analysis	USN-4	As a healthcare analyst, I want to compare health indicators across available patient categories so that I can identify patterns in the data.	Comparisons update correctly using the available fields and filters.	High	Sprint-2
Dashboard User	Business Insights& Analytical Outputs	USN-5	As a dashboard user, I want to view charts, KPI cards, and visual summaries so that I can understand healthcare data more easily.	Dashboard displays the designed charts and KPI summaries correctly	High	Sprint-2
Dashboard Use	User Interaction & Analysis	USN-6	As a dashboard user, I want to filter the dashboard by available categories so that I can explore specific subsets of healthcare data.	Selecting a filter updates the relevant visualizations correctly.	Medium	Sprint-2
Data Analyst	Data Update & Reporting	USN-7	As a data analyst, I want to refresh the dashboard when the source dataset is updated so that the analysis reflects the latest available data.	After a successful refresh, the dashboard reflects the updated source data.	Medium	Sprint-2
Project Reviewer	Business Insights & AnalyticsOutputs	USN-8	As a project reviewer, I want to view and share the completed dashboard so that I can review the project's analytical findings.	The dashboard can be accessed or shared using the configured Tableau publishing method.	Medium	Sprint-2
