Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A	Analyze	It is	The patient	Concerned about

	healthcare Data Analyst	patient health indicators and identify patterns associated with heart disease, diabetes, and stroke.	difficult to identify and compare health risk patterns across different age groups, genders and health measure ments using raw data.	data requires systematic analysis and visualization to understand relationship between health indicators and recorded diseases.	missing important health pattern and making decisions without clear data-driven insights.
PS-2	A public health analyst	Understand how lifestyle factors such as exercise , smoking,alco hol consumption, and BMI vary across patient with different recorded health conditions.	Comparin g lifestyle factors and health condition s across patient groups is difficult when the informati on is presente d in raw tabular form.	The datasets contains multiple demographic , lifestyle, symptoms, and health-condition variable that needs to be compared and visualized together.	Frustrated by the difficulty of identifying meaningful patterns that could support better public health analysis.
