Project Design Phase-I
Solution Architecture

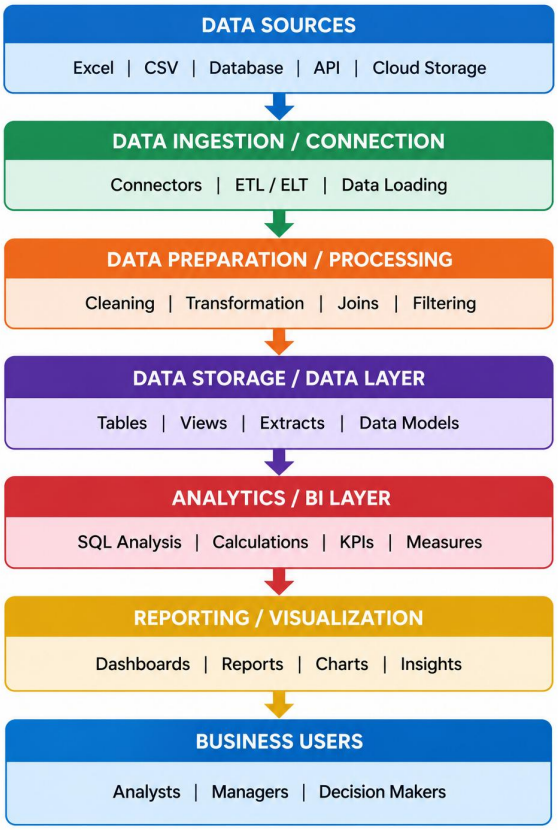

Date	20 October 2026
Team ID	Deepika Landge
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytic
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Sample Solution Architecture Diagram:

Component Description Table

Component name	Description/Role in Architecture	Technalogy used
Data source	Stores patient health data used for analysis.	CSV Dataset
Data Preparation& Analysis	Cleans, transforms, and analyzes patient data; calculates KPIs and summary metrics.	Tableau Desktop, Tableau Calculated Fields
Visualization & Reporting	Displays interactive dashboards, charts, filters, and healthcare insights.	Tableau Worksheets, Dashboards, Tableau Stories
